KEEL-BILLED TOUCANS

Keel-Billed Toucans are one of the prettiest birds you can see in the rainforest. They like to live high up in the trees in the area known as the 20 18 5 5 3 1 14 15 16 25. They have wings but are not very good flyers. Instead, they prefer to jump and hop from branch to branch. One of the most noticeable features of toucans are they large 2 9 12 12 19. They are one-third the length of their bodies! They might look heavy because they are so big, but the toucan's bill is 8 15 12 12 15 23 and actually very 12 9 7 8 20. It's made out of the same material that your fingernails are made out of. The toucan's bill helps it to reach fruit in trees. This bird's favorite food is 6 18 21 9 20 19 and 2 5 18 18 9 5 19, but they will also eat insects and small reptiles.
